

November 11, 1999

In this moment of pain, the Government of Cape Verde expresses its profound sorrow for the irreplaceable loss of a man who became Cape Verdean to better serve his high ethical and spiritual ideals.

OFFICE OF THE PRIME MINISTER,
PRAIA NOVEMBER 8, 1999.

SENSE OF HOUSE REGARDING THE TRAFFICKING OF BABY PARTS

SPEECH OF

HON. ROBERT B. ADERHOLT

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 11, 1999

Mr. ADERHOLT. Mr. Speaker, I would like to lend my support to H. Res. 350, which I have co-sponsored, which expresses the sense of the House that Congress should exercise its oversight responsibilities and conduct hearings into the possible trafficking of baby parts for profit.

Throughout the abortion debate, many Americans have come to realize that abortion is a morally repugnant act which has no place in a civilized society. In spite of the brutality of partial-birth abortion and other abortion methods which more Americans have become aware of in recent years, Congress has been unable to override a Presidential veto which would outlaw this practice.

Many Americans are beginning to reevaluate their views on this issue. Recently uncovered evidence shows that infants "delivered" by partial-birth abortion and even those born alive have been killed for their body parts. Private companies have circumvented laws banning this practice by acting as "middlemen" in this gruesome trade by selling baby body parts from abortion clinics to research facilities.

My colleagues, certainly we can begin to take some action to address this terrible practice. I strongly urge you to join me in voting for H. Res. 350, to express the sense of the House that Congress should conduct hearings into the possible trafficking of baby parts for profit. Let's show this Nation that the unborn should be protected by conducting hearings and getting more information on this issue.

PERSONAL EXPLANATION

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1999

Mr. OWENS. Mr. Speaker, yesterday I was unavoidably absent on a matter of critical importance and missed the following vote: On the agreement to the amendment to H.R. 1714 introduced by the gentleman from Michigan, Mr. DINGELL, I would have voted "yea."

EXTENSIONS OF REMARKS

WESTSIDE AMERICAN HEART WALK

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1999

Mr. WAXMAN. Mr. Speaker, I rise today to ask my colleagues to join me in recognizing the American Heart Association on the occasion of the 1999 Westside American Heart Walk.

The Westside American Heart Walk will kick off on Saturday, November 20, 1999. This year's event chair is Philip P. Thomas, the Chief Executive Officer of the V.A. Greater Los Angeles Healthcare System. More than 3,500 enthusiastic walkers are expected to participate in the non-competitive 5K walk and fun run. Proceeds from the event will go toward cardiovascular research grants and community education programs throughout the greater Los Angeles area. I am delighted to participate in this very important cause.

Cardiovascular disease is the leading cause of death in our country. It takes the lives of about 960,000 each year, including more than 25,000 residents of Los Angeles County. I want to commend the American Heart Association for its fight against cardiovascular disease and strokes. It raised \$312 million during fiscal year 1997-1998 for research and education and community programs. Without the hard work and dedication of more than 4 million volunteers, the American Heart Association could not fulfill its important mission each year.

I ask my colleagues to join me in congratulating Philip P. Thomas and the staff, volunteers, and friends of the American Heart Association on their tremendous work to make the 1999 Westside American Heart Walk a success.

OP-ED BY FORMER CONGRESSMAN PETER RODINO ON THE NEED FOR WARNING LABELS ON RAW SHELL EGG CARTONS

HON. FRANK PALLONE, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 10, 1999

Mr. PALLONE. Mr. Speaker, over the last two years I have been growing increasingly concerned about the difficulty the federal government has had in combating outbreaks of food borne illnesses in this country. Food borne illnesses are on the rise and, according to a recently released report by the Centers for Disease Control and Prevention are occurring with a far greater frequency—more than double the rate—than was previously thought.

In an effort to address this troubling trend, I have introduced two pieces of legislation this Congress that would improve the safety of the Nation's food supply. The first, the Consumer Food Safety Act, would establish a comprehensive food safety inspection and education program across the nation. The second, the National Uniform Food Safety Labeling Act, would help consumers make more in-

29661

formed choices about the food they eat through warning labels placed on food packaging.

One particular aspect of the second bill I wanted to mention tonight concerns the placement of warning labels on egg cartons. I wanted to mention this for two reasons. The first is that the Secretary of Health and Human Services is expected soon to make a final recommendation on a proposal put forth in July to require warning labels on raw shell egg cartons. I strongly support that language and recently sent a letter to the Secretary urging her to finalize the language proposed in July, which I think will go a long way in protecting consumers against food borne illnesses caused by eggs.

The second reason I wanted to mention this particular provision is one of the House's most distinguished former Members, Congressman Peter Rodino from my home State of New Jersey, has written an op-ed on this matter. Congressman Rodino's op-ed succinctly describes the problem, and the reasons why the Secretary's July language on raw shell egg safety should be finalized.

I commend Congressman Rodino for recognizing the importance of this issue. He is right on the mark in his suggestion that the Federal Government should be looking at food safety as a priority issue. To that end, I submit his op-ed for the record and urge all of my colleagues to follow the suggestions of one of the most respected public figures to ever have served the people of New Jersey and the Nation.

Over the past few years, I've followed with great interest news and television stories about food poisoning. And, this summer, I was disturbed to learn that the incidence of food borne illness is on the rise, and that according to the Centers for Disease Control, 76 million Americans became ill and 5,000 die annually from food poisoning. While E. coli and mad cow disease are significant, severe illness caused by salmonella bacteria are pandemic, and eggs stubbornly remain the number one source of food poisoning caused by salmonella.

Salmonella contaminated shell eggs is an excellent example of government recognizing a major health problem on one hand, and having a solution on the other, yet sitting on its hands.

The Department of Health and Human Service (HHS) projects that the number of cases of illness due to food poisoning from eggs will continue to rise significantly from an estimated 660,000 cases each year. Recently at a public hearing in Washington, both the Food and Drug Administration (FDA) and the United States Department of Agriculture (USDA) agreed upon a goal of reducing salmonella egg related illness by 50% by the year 2005.

I commend Secretary Donna Shalala for her efforts to combat food borne illnesses by proposing stronger warning labels on egg cartons to warn consumers about the risk of illnesses caused by salmonella.

I've also learned, the very same FDA created a standard to pasteurize a raw egg in its shell, and the USDA designed a process to inspect raw egg pasteurization, even certifying it with a special seal of approval. Experts point out this is a 99.999% solution to the problem.

While I commend the FDA for approving this egg pasteurization technology and the USDA for creating a mechanism for the protection against salmonella, until full-scale,
